

Individual training report v2 — repro_c2_slide8pure_8b_e40

Status: complete

Model/base: Qwen/Qwen3-8B

Dataset: data/poem/examples_v4.jsonl

Pipeline: vmissing

Censorship: rag × remove

Loss: vocab mse

Run class: missing (source frozen_config; frozen-config value missing).

Update geometry/aggregation: `missing`; logged measure `historical\_answer\_mean`

Realized update geometry: missing

Batching: missing; micro-batch 1; gradient accumulation 8.

Connected hidden window: width 8, stride 1; final-logit training disabled.

Items observed: 0; elapsed telemetry span: 269.6 min.

Strict-local certification: MISSING OR FAIL; the frozen vocabulary and cross-block gradients are audited.

Historical inline recall (CER and line exactness)

epoch	corpus	cer	line_exact
1	historical_inline_line_exact	0.8554	0.0000
3	historical_inline_line_exact	0.7577	0.0000
5	historical_inline_line_exact	0.7516	0.0000
7	historical_inline_line_exact	0.7754	0.0000
9	historical_inline_line_exact	0.6938	0.1250
11	historical_inline_line_exact	0.4877	0.3750
13	historical_inline_line_exact	0.2797	0.6250
15	historical_inline_line_exact	0.1970	0.7500
17	historical_inline_line_exact	0.0000	1.0000
19	historical_inline_line_exact	0.2427	0.7266
21	historical_inline_line_exact	0.0903	0.8776
23	historical_inline_line_exact	0.0136	0.9875
25	historical_inline_line_exact	0.0000	1.0000
27	historical_inline_line_exact	0.0000	1.0000
29	historical_inline_line_exact	0.0000	1.0000
31	historical_inline_line_exact	0.0572	0.9219
33	historical_inline_line_exact	0.0136	0.9875
35	historical_inline_line_exact	0.0000	1.0000

Historical inline recall (CER and line exactness) (continued)

epoch	corpus	cer	line_exact
37	historical_inline_line_exact	0.0821	0.9205
39	historical_inline_line_exact	0.0000	1.0000

Standard-benchmark damage

Missing.

Coverage and provenance

Optimizer loss measure: historical_answer_mean

Parameter-change representation: missing

Teacher target source: missing; cache hash: missing

Missing evidence:

- epoch-zero recall
- epoch-zero standard benchmark
- epoch-zero parameter delta
- per-epoch parameter delta
- signal attribution artifact

Source artifacts: report.md, config.yaml, metrics.jsonl, eval/report_v2/, and eval/signal_attribution.json when present.

Recall by corpus

Standard-benchmark retention

Missing figure: standard_damage.png

Recall-damage trajectory

Missing figure: recall_damage_frontier.png

Per-layer loss by epoch

Per-layer loss heatmap

One-row per-layer loss density

Per-layer parameter modification by epoch

Missing figure: parameter_delta_temporal.png

Per-layer parameter-modification heatmap

Missing figure: parameter_delta_heatmap.png

One-row parameter-modification density

Missing figure: parameter_delta_one_row_density.png

Per-layer training-signal attribution

Missing figure: signal_attribution_by_layer.png
