

July 11 1.7B loss-grid checkpoint scorecard

1.7B Loss-Grid Live Report

Generated 2026-07-11T12:26:53+00:00.

Recall columns are deliberately corpus-separated. A `fast epoch probe` uses the fixed in-training subset; `full checkpoint eval` is the post-training evaluation. Standard deltas are paired within their stated source: fast epoch-0 subset or full pinned Qwen3-1.7B reference on ARC-Easy, ARC-Challenge, and HellaSwag.

run	loss	slide	status	items	epoch	recall	source	Machado	Quijote 1	Quijote 4	mean	standard Δ	worst Δ
